Index to Volume XIII., Series II.

A.

Absorption, The Law of, of High Frequency Radiation, *Arthur H. Compton*, 296.

Absorption Coefficient of the Penetrating Radiation, *Oliver H. Gish*, 155.

Absorption Frequencies, On the Critical, of Chemical Elements of High Atomic Numbers, *William Duane and Takeo Shimizu*, 159.

Absorption Glasses, Pyrometer, *Paul D. Foote, C. O. Fairchild and F. L. Mohler*, 287.

α particles, The Automatic Registration of, β particles and γ ray and X-ray Pulses, *Alois F. Kovarik*, 272, 480.

α- and β-Particles, A Device for the Automatic Registration of the, and γ-Ray Pulses, *Alois F. Kovarik*, 153.

Acetylene Flame, Note on the Distribution of Energy in the Visible Spectrum of a Cylindrical, *Edw. P. Hyde, W. E. Forsythe and F. E. Cady*, 157.

Alternating Currents, The Measurement of Small, by Means of a Rayleigh Resonator, *F. R. Watson*, 287.

American Physical Society:
Abstracts, 140, 283.
Minutes, 135, 137, 281.

Amplification of the Photoelectric Current by means of the Audion, *Carl Eli Pike*, 102.

Applied Voltage. Energy of the Characteristic X-Ray Emission from Molybdenum and Palladium as a Function of, *Benjamin Allen Wooten*, 71.

Anemometer, A New Type of Hot Wire, *T. S. Taylor*, 146.

Anslow, Gladys A., The Logarithmic Law Connecting Atomic Number and Frequency Differences in Spectral Series, 326.

Argon, The Ionizing Potentials of, Neon and Helium, *H. C. Rentschler*, 297.

Arsenic, Ionization and Resonance Potentials for Electrons in Vapors of, Rubidium and Caesium, *Paul D. Foote, O. Rognley and F. L. Mohler*, 59.

Arsenic, Ionization and Resonance Potentials for Electrons in Vapors of, Rubidium and Caesium, *Paul D. Foote, O. Rognley and F. L. Mohler*, 156.

Atmosphere, The Temperature, Pressure and Density of the, in the Region of Northern France, *W. J. Humphreys*, 146.

Atomic Number, The Logarithmic Law Connecting, and Frequency Differences in Spectral Series, *Gladys A. Anslow*, 326.

Audion, Amplification of the Photoelectric Current by Means of, *Carl Eli Pike*, 102.

Audion, The, as a Circuit Element, *H. W. Nichols*, 404.

Automatic Registration, A Device for the, of the α- and β-Particles and γ-Ray Pulses, *Alois F. Kovarik*, 153.

Automatic Registration, The, of α particles, β particles and γ ray and X-ray Pulses, *Alois F. Kovarik*, 272, 480.

B.

Ballistics, Interior, by a New Gun Indicator, *A. G. Webster*, 164.

Banerji, Sudhansukumar, On the Vibrations of Elastic Shells Partly Filled with Liquid, 171.

Bauer, L. A., Some Interesting Results of Eclipse Magnetic Observations, 160.

Band Series II., The Mathematical Structure of, *Raymond T. Birge*, 360.

Barometric Pressure, On the Measurement of the True, in a Rapidly Moving Current of Air, *J. G. Coffin*, 317.

β particles, The Automatic Registration of α particles, and γ ray and X-ray Pulses, *Alois F. Kovarik*, 272, 480.

Binaural Location, The Function of Phase Difference in the, of Pure Tones, *R. V. L. Hartley*, 373.

Birge, Raymond T., The Mathematical Structure of Band Series II., 360.

Black Body, A New Experimental Determination of the Brightness of a, and of the Mechanical Equivalent of Light, *Edward P. Hyde, W. E. Forsythe and F. E. Cady*, 45.

Blom, E. C., Temperature Coefficient of Resistance of Molybdenum, 308.

Bomb Trajectories, Note on, *Edwin B. Wilson*, 305.

C.

Cady, F. E., A New Experimental Determination of the Brightness of a Black Body, and of the Mechanical Equivalent of Light, 45.

Cady, F. E., Note on the Distribution of Energy in the Visible Spectrum of a Cylindrical Acetylene Flame, 157.
Cæsium, Ionization and Resonance Potentials for Electrons in Vapors of Arsenic, Rubidium and, *Paul D. Foote, O. Rognley and F. L. Mohler*, 156.
Carborundum, The Crystal Structure of, *A. W. Hull*, 292.
Carter, Edna, Further Observations on the Production of Metallic Spectra by Cathode Luminescence, 152.
Caswell, A. E., An Extension of the Electron Theory of Metals. I., Thermoelectricity and Metallic Conduction, 386.
Cathode Luminescence. Further Observations on the Production of Metallic Spectra by, *Edna Carter and Arthur S. King*, 152.
Cathode Vacuum Tube, Note on the Use of the Hot, for the Measurement of Voltage, *Lynde P. Wheeler*, 298.
Cathodic Sputtering, Silvering Quartz Fibers by, *J. E. Shrader*, 163.
Characteristics of Glasses, Some, in the Annealing Range, *A. Q. Tool and J. Valasek*, 147.
Chemical Elements, On the Critical Absorption Frequencies of, of High Atomic Numbers, 159.
Chinmayanandam, T. K., On the Specular Reflection from Rough Surfaces, 96.
Circuit Element, The Audion as a, *H. W. Nichols*, 404.
Clouds, Why, Never Form in the Stratosphere, *W. J. Humphreys*, 161.
Cobalt, Magneto-striction with Special Reference to Pure, Part I., The Wiedemann Effect, *Howard A. Pidgeon*, 209.
Coblentz, W. W., The Spectral Photoelectric Sensitivity of Molybdenite, 140.
Photoelectric Sensitivity vs. Current Rectification in Molybdenite, 154.
Effect of Crystal Structure upon Photoelectric Sensitivity, 163.
The Spectral Photo-electric Sensitivity of Silver Sulphide, 291.
Coffin, J. G., On the Measurement of the True Barometric Pressure in a Rapidly Moving Current of Air, 317.
Compton, A. H., An Addition to the Theory of the Quadrant Electrometer, 288.
The Law of Absorption of High Frequency Radiation, 296.
Compton, K. T., A Possible Relation between the Resonance Potential and Specific Inductive Capacity of a Metallic Vapor and its Properties in the Solid State, 295.
An Addition to the Theory of the Quadrant Electrometer, 288.
The Passage of Photoelectrons Through Metals, 374.
Crehore, Albert C., With Further Reference to the Force between two Revolving Electrons at a Great Distance, 89.
Crystal Structure, Effect of, upon Photoelectric Sensitivity, *W. W. Coblentz*, 163.

D.

Dadourian, H. M., On the Characteristics of Electrically Operated Tuning Forks, 164.
On the Characteristics of Electrically Operated Tuning Forks, 327.
Davis, Bergen, Ionization and Excitation of Radiation by Electron Impact in Nitrogen, 1.
Density, The Temperature, Pressure and, of the Atmosphere in the Region of Northern France, *W. J. Humphreys*, 146.
Dental Materials, Some Physical Properties of, *C. G. Peters and W. H. Souder*, 302.
Detection Coefficient, On the Measurement of the, of Thermionic Vacuum Tubes, *H. J. Van der Bijl*, 311.
Detectors, Permanent-Contact Crystal, *Louise S. McDowell*, 288.
Diffraction-Fringes, On the Theory of Superposed, *Chandi Prasad*, 27.
Diffraction-Figures, On the, due to an Elliptic Aperture, *C. V. Raman*, 259.
Dilatometer, A Simple Stretched Wire, *Arthur W. Gray*, 142.
Dodd, L. E., Striæ in Optical Glass, 162.
Duane, William, On the Relation between the K Series and the L Series of X-Rays, 306.
Are the Frequencies in the K Series of X-Rays the Highest Frequencies Characteristic of Chemical Elements, 289.
On the Critical Absorption Frequencies of Chemical Elements of High Atomic Numbers, 159.
Dynamics, The, of the Rifle Fired at the Shoulder, *A. G. Webster*, 164.

E.

Elastic Shells, On the Vibrations of, Partly Filled with Liquid, *Sudhansukumar Banerji*, 171.
Electric Discharge on the Surface of a Solid Electrolyte, *Was. Sulejkin*, 197.
Electrolyte, Electric Discharge on the Surface of a Solid, *Was. Sulejkin*, 197.
Electron, The Properties of the, as Derived from the Chemical Properties of the Elements, *Irving Langmuir*, 300.
Electron, On the Mechanical and Electrodynamical Properties of the, *Megh Nad Saha*, 34.
Electrons, Ionization and Resonance Potentials for, in Vapors of Arsenic, Rubidium, and Cæsium, *Paul D. Foote, O. Rognley and F. L. Mohler*, 59.
Electrons, With Further Reference to the Force between two Revolving, at a Great Distance, *Albert C. Crehore*, 89.
Electrons, Ionization and Resonance Potentials for, in Vapors of Arsenic,

Rubidium and Cæsium, *Paul D. Foote, O. Rognley and F. L. Mohler*, 156.
Electron, On the Mechanical and Electrodynamical Properties of the: Addendum, *Megh Nad Saha*, 238.
Electron Impact, Ionization and Excitation of Radiation by, in Nitrogen, *Bergen Davis and F. S. Goucher*, 1.
Electrons, Collisions of Slow Moving, with Nitrogen Molecules, *S. Karrer*, 297.
Electron Theory, An Extension of the, of Metals. I., Thermoelectricity and Metallic Conduction, *A. E. Caswell*, 386.
Elliptic Aperture, On the Differation-Figures due to an, *C. V. Raman*, 259.
Elements, The Properties of the Electron as Derived from the Chemical Properties of the, *Irving Langmuir*, 300.
Energy, Note on the Distribution of, in the Visible Spectrum of a Cylindrical Acetylene Flame, *Edw. P. Hyde, W. E. Forsythe and F. E. Cady*, 157.
Energy, A New Formula for the Spectral Distribution of, from a Complete Radiator, *Irwin G. Priest*, 314.
Errata, 480.
Expansion, The Thermal, of Living Tree Trunks, *C. C. Trowbridge* (deceased) *and Mabel Weil*, 286.
Expansion, An Interferential Method for Measuring the, of Very Small Samples, *C. G. Peters and Irwin Priest*, 299.
